Response to Examiner's Restriction Requirement

Sir:

In the Office Action dated 08/23/2005, paper No. 20050817 in the above-referenced application, the Examiner issued a Restriction Requirement identifying the following groups of claims as being drawn to potentially distinct inventions:

Group I. Claims 1 – 8 and 38-41, drawn to a product, classified in class 349, subclass 158.

Group II. Claims 19-37, drawn to a process, classified in class 216, subclass 24.

The Examiner further identified the following species belonging to Group I:

Species A, identified by a support substrate which is a relatively soft non-display glass;

Species B, identified by a support glass which is a recyclable glass substrate;

Species C, identified by a support substrate which has a low density relative to the display substrate;

Species D, identified by a support substrate having a corrugated surface;

Species E, identified by a support substrate having an egg-carton pattern; and

Species F, identified by a support substrate including a plurality of holes.

The examiner contends that no claim is generic to the identified species.

Remarks/Arguments begin on page 3 of this paper.
